Never take anything from medicine cabinets.
Many of these things can make you really
sick if you use them the wrong way.

Poisons come in many forms

Poisons come in many shapes, sizes and colors. Sometimes it's hard to tell if something *is* a poison. Poison can get into your body in different ways. It can make you sick if you touch it, taste it, breathe it, smell it, or get it on your skin.

See if you can get safely home without touching the poisons!
